EDUCATION

Montclair State University
BS Computer Science *GPA: 3.3*

New Jersey
Sep 2016 - May 2020

WORK EXPERIENCE

Self Employed

Mining and Trading crypto currencies

Nov 2020 - Present

- Built a mining rig to mine Ethereum and other crypto currencies, such as Dogecoin and Raven Coin
- Camped out in front of stores for months for Graphics cards to start my self employment
- Build multiple computer rigs for me and my friends with a lot of different components.
- Bought and sold different currencies like dogecoin and Ethereum on trading platforms like robinhood and TrustWallet
- Finally, I learned the importance of patience

Allendale SteakHouse

Busser

Allendale, NJ
March 2020 - March 2020

- Cleaned all tables before and after guests arrived at the place
- Helped servers with large-parties, with the food and drinks
- Refilled drinks and opened bottles of wine and Champaign for guests

Uncle Paul's Restaurant

Busser

Manhattan, NY
Sep 2014 - Sep 2015

- Swept, wiped and cleaned tables before and after individuals arrived.
- Interacted with a lot of people, and showed tremendous respect to each individual.
- Ran food from kitchen to table to serve guests.
- Refilled drinks, and placed water and bread on tables before or after guests arrived

SKILLS

Programming Languages: Java, Javascript, PHP, SQL, React

Technologies: Windows 7/10, Eclipse, JetBrains, GitBash, Git Desktop, Git, Mac OS, Visual Studios

PROJECTS

Rio Summer Olympics Tickets Platform *React, Redux, Javascript*

<https://aglasswala.github.io/Summer-Olympics/#/>

A platform where three different types of users can register and log in. Regular users can reserve tickets. Administrators can create and update competition events and Athletes another user type can create autograph sessions so that regular users can attend.

Data Structures and Algorithms *Java, Javascript*

<https://github.com/GranitG/DataStructuresandAlgorithms>

Used different Data Structures and Algorithms to complete challenges in LeetCode.com. Able to solve easy problems, medium problems, and some hard problems.

Organized our own Hackathon

Montclair state University has never hosted a hackathon before, so the computer club which includes me organized our first ever hackathon that had over 130 participants. We had quite a few sponsors including google, Monster and even UPS. Although we were not certified by MLH we still did the hackathon with the money we fund raised through school and sponsors.

SUMMARY

I am a future software engineer with a broad interest across the stack. I have a particular fondness for learning new data structures, studying software design patterns and creating or working with performant algorithms.
